

Press Release:

New Partner for InProcess Instruments in Great Britain and Ireland

Bremen, April 2009. With immediate effect Henniker Scientific Ltd. of Warrington, UK is the new sales and distribution partner of InProcess Instruments of Bremen, Germany. Henniker Scientific, which was founded at the outset of 2009, offers a comprehensive range of technical solutions and services in the field of gas analysis as well as for vacuum and surface technologies together with selected manufacturers. In addition to quadrupole mass spectrometry the product range includes UHV components for surface analysis.

Terry Whitmore, the founder of Henniker Scientific, has over 15 years of experience in the quadrupole mass spectrometry business. Over the years he has co-authored many scientific articles on the exploitation of mass spectrometry and analysis as well as other innovative processes. Henniker Scientific Ltd. distributes and markets virtually all InProcess Instruments quadrupole mass spectrometers in Great Britain and Ireland.

On the occasion of the AFACT 09 Conference on recent advances in process analysis and control from May 5th to 7th, 2009 in Glasgow, Scotland both companies will jointly appear at the venue.

Wolfgang Hrosch, Managing Director of InProcess Instruments commented “We are extremely pleased to have found such an excellent partner in the UK after an extensive search. With his years of professional experience as well as the customer and solution orientation of the company Terry Whitmore and Henniker Scientific are precisely the right partner for our sophisticated quadrupole analysis.”
