

## **Press release**

### **InProcess Instruments exhibits at analytica Anacon India 2009**

**Bremen/Hyderabad, September 2009. InProcess Instruments, a leading global provider of specialised quadrupole mass spectrometers for online gas analysis, will exhibit their products at analytica Anacon India this year. The company hopes to find new partners.**

Online mass spectrometers manufactured by InProcess Instruments represent highest product quality, reliable service, dedicated application support and continuous product advancement. They would like to access the subcontinent's market with customised solutions for process analysis, predominately in industrial and R&D environments,

At the company's location in Bremen, Germany, a team of experts including chemists, physicists and engineers develops and manufactures sophisticated quadrupole mass spectrometer technology for industrial applications according to customer specifications. The company's specialist technicians provide on-site service all over the world.

The main fields of application for this multicomponent analytic technology are online process monitoring, quality monitoring, environmental control as well as process development, research and laboratory analyses. The company primarily services the chemical industry, steel manufacturers and processors, gas suppliers as well as research institutes. The range of products also includes equipment for

specialised applications in glass and light bulb production. Industrial biotechnology firms and pharmaceutical companies as well as their suppliers are a new target group.

InProcess Instruments was successfully certified for the areas of Research & Development, Manufacturing, Sales and Servicing by TÜV NORD CERT GmbH in spring 2009. The DIN EN ISO 9001:2000 Quality Management Certificate is available at [www.in-process.com](http://www.in-process.com) in the „Downloads“ section. The company's Internet website was recently revised and relaunched in May 2009.

**Come and visit us at analytica Anacon India,  
29<sup>th</sup> Sept. to 01<sup>st</sup> Oct. 2009  
German Pavilion, Booth No.: H2/c1.6**
