

InProcess Instruments Gesellschaft für Prozessanalytik mbH, based in Bremen, Germany, develops, produces and markets mass spectrometers for online gas analysis in industry, research and laboratories. As a provider of special solutions in analysis technology, we have been successfully operating in the market for more than 20 years. This was and is only possible due to the strength of our employees, a team of natural scientists, engineers and technicians, who individually implement customer-specific tasks to our online gas analysis solutions.

For the extension of our software development team in Bremen, we are looking at the earliest possible start date for a ...

Software Developer (m/f/d) - Focus on IoT / Industry 4.0

Professionalism and Customer-Oriented Solutions - Your Area of Responsibility

- Development of modular network solutions and integration of intelligent sensors into a data acquisition system for online gas analysis by mass spectrometers
- Cross-platform front-end development for different target devices
- High-performance backend connections for exchange of large data volumes (mass spectra) based on a NoSQL database

Competence and Experience - Your Profile

- In addition to a degree in computer science or an adequate IT-relevant degree, you have several years of experience in frontend development, especially with JavaScript or the Angular framework. It is a matter of course for you to implement software with focus on ease of use, to effectively design frontend structures and to be open-minded towards new technologies.
- You have experience in using MS Visual Studio/Code, developing with the .NET Framework and the C# programming language, as well as a good knowledge of software architecture and design, and you enjoy working in Scrum teams.
- We are happy to offer dedicated career starters an interesting start.

Your Technical Know-How Will Be Rewarded - Our Offer

- Look forward to a pleasant working environment in an open corporate culture and the opportunity to contribute your skills and experiences creatively.
- We offer above-average compensation, a flexible working time model and the payment of holiday and Christmas bonuses.
- We promote and support our employees with continuous upskilling and development.
